BOROUGH OF CHESTERFIELD.

HEALTH COMMITTEE, 1929—1930.

THE MAYOR (Councillor H. J. Watson).

Chairman: COUNCILLOR R. A. McCREA.

Vice-Chairman: ALDERMAN T. W. LACK, J.P.

Members:

Alderman Crossley		Councillor Oakley
„ Edmunds, O.B.E., J.P.	„	Thacker
„ Sims	„	Thompson
Councillor Mary Ashmore		Twelves
„ Blanche Eastwood	„	Wicks
„ Harrison	„	Wright
„ Hatton		

MATERNITY AND CHILD WELFARE COMMITTEE.

THE MAYOR (Councillor H. J. Watson).

Chairman: COUNCILLOR R. A. McCREA.

Vice-Chairman: ALDERMAN T. W. LACK, J.P.

Members:

Alderman Crossley		Councillor Hatton
„ Edmunds, O.B.E., J.P.	„	Oakley
„ Sims	„	Thompson
Councillor Mary Ashmore		Twelves
„ Blanche Eastwood	„	Wright
„ Harrison		

Co-opted Members:

Mrs. Hawksley Edmunds

Mrs. Harrison

Mrs. W. B. Robinson, senr.

Mrs. H. P. Short

Mrs. Tucker

Voluntary Workers at the Clinics.

Mrs. ADAMS, Devonshire Avenue, New Whittington,
Chesterfield.

Mrs. BARKER, 41, Sterland Street, Chesterfield.

Mrs. CALWAY, Manor House, Brimington, near Chesterfield.

Mrs. CUTTS, 87, Station Road, Whittington Moor, Chesterfield.

Mrs. W. H. EDMUNDS, Scarsdale House, Gladstone Road,
Chesterfield.

Mrs. FOXON, 41, Avondale Road, Chesterfield.

Mrs. GRATTON, 42, Newbold Road, Chesterfield.

Mrs. HADDOCK, 6, Avondale Road, Chesterfield.

Mrs. HAIGH, 111, Newbold Road, Chesterfield.

Mrs. HARRISON, 31, Cobden Road, Chesterfield.

Mrs. MAYCOCK, 43, Sterland Street, Chesterfield.

Mrs. OWEN, Holly House, Norbriggs.

Mrs. PEARSON, Red House, Stonegravels, Chesterfield.

Mrs. ROBINSON, Moorside Cottage, Chesterfield.

Miss SHENTALL, Avenue Road, Whittington Moor,
Chesterfield.

Mrs. SHORT, Rockley Cottage, Linden Avenue, Chesterfield.

Miss SANDERS, Somersall Hall, Chesterfield.

Mrs. SIMS, 79, Wellington Street, New Whittington,
Chesterfield.

Mrs. SIMS, 61, Wellington Street, New Whittington,
Chesterfield.

Mrs. STATON, Ingledene, Brookside, Chesterfield.

Mrs. SWALLOW, Oakfield Avenue, Chesterfield.

Miss TAYLOR, Avondale Road, Chesterfield.

Mrs. TUCKER, The Cedars, Newbold Road, Chesterfield.

Mrs. WARD, Devonshire Avenue, New Whittington,
Chesterfield.

HEALTH DEPARTMENT,

SALTERGATE,

CHESTERFIELD.

May, 1930.

*To the Chairman and Members of the Health Committee
of the Borough of Chesterfield.*

Mr. Chairman, Ladies and Gentlemen,

I have the honour to submit my first Annual Report on the Health and Sanitary conditions of the Borough for the year 1929.

The general arrangement of the report differs somewhat from that adopted in previous years, the statistical matter being removed from the descriptive matter and confined to a separate section. The text contains a marginal index which enables the appropriate tables to be easily found.

I should like to express my thanks to you, Sir, and the other members of the Health and Maternity and Child Welfare Committees for the unfailing support I have received since I took up my appointment in January.

In conclusion, I have to thank my colleagues in the other Corporation Departments both for their kindly co-operation during the year and for the assistance they have rendered me in compiling this report, and also the members of my own staff for their loyal and efficient service during the year.

I am, Ladies and Gentlemen,

Your obedient Servant,

J. A. STIRLING,

Medical Officer of Health.

Report of the Medical Officer of Health, for the Year 1929.

NATURAL AND SOCIAL CONDITIONS OF THE AREA.

The area of the Borough is 8,468 acres. Population at *Appendix 2.* census 1921—61,232. Population estimated by Registrar-General to middle of 1929—65,270, and it is upon this figure that the calculations in this Report have been based.

Physical Features of the Area. Chesterfield is built mainly on clay but there are also areas of rock, shale and coal, rendering the general drainage of the ground much better than if wholly consisting of clay.

Social Conditions of the Area. The social conditions of the Borough are mainly industrial, the chief occupations of the inhabitants being Coal Mining, Engineering, Pottery-making, Box-making, and the manufacture of Surgical Dressings. The general condition of trade in the area is still very depressed.

VITAL STATISTICS.

(a) The population of Chesterfield for 1929, as *Appendix 2.* estimated by the Registrar-General, is 65,270, showing a decrease of 360 on the figures for 1928.

(b) *Births.* The total number of births in the Borough *Appendices 3 & 4.* was 1,213, giving a birth rate of 18.58 per 1,000 as against that of 16.3 for England and Wales as a whole. The figure for last year was 19.21.

On looking at the birth rate as affecting the Wards, the Rother (26.6) and Old Whittington (23) Wards have the highest rates, whilst the West (12.6) and New Whittington (12.9) Wards have the lowest rates.

Natural Increase. The excess of births over deaths was *Appendix 4.* 444, giving a rate of 6.8 per 1,000 of the population.

Appendices 3, 5 & 10. (c) *Deaths.* During 1929, 769 deaths took place, giving a death rate of 11.78 as against a rate of 13.4 for England and Wales as a whole. This rate shows a slight increase on the rate for 1928, that figure being 10.16.

Appendices 5 & 7. As regards the Ward distribution, the Central Ward shows by far the greatest rate (17.1), while the West (7.8), Hasland (8.5), and New Whittington (8.8) Wards show the lowest rates.

The greatest mortality from Tuberculosis seems to have fallen on the Rother Ward, which shows 17 deaths, which is about a third of the whole of the deaths in the Borough from this disease; in fact the mortality from all forms of Respiratory Disease seems to have fallen most on this Ward.

The deaths from all other diseases seem to have been fairly equally distributed throughout the various Wards, except that the Central Ward shows a rather high cancer mortality—15 deaths.

Appendix 6. *Age Distribution and Causes of Death.* The Respiratory Diseases caused a considerable number of deaths, namely 176, which is an increase of 31 on last year's figures. The figures for 1929 demonstrate very clearly that a high respiratory death rate is accompanied by a similar state of affairs with regard to heart disease, there having been 168 deaths from this cause during the year as against 112 in 1928. The increase in the deaths from the two classes of disease mentioned above explain in the main the increase of 102 deaths in the 1929 figures as against those for 1928, and this increase is fully accounted for by the severity of the weather in the first quarter of the year, during which period a great proportion of these deaths occurred.

It is pleasing to note that the cancer deaths, although still high, namely 72, show a decrease of 21 on last year's figures.

There is nothing special to note respecting the deaths from other causes than those already mentioned.

Infants under 1 year and adults over 55 show the greatest number of deaths, these two age groups accounting for 484 of the total.

GENERAL PROVISION OF HEALTH SERVICES
IN THE AREA.

HOSPITALS.

(1) *Tuberculosis.* Institutional treatment when *Appendices 20 & 24.* required is provided by the Derbyshire County Council at either Walton Sanatorium or Penmore Tuberculosis Pavilion.

(2) *Maternity.* The Corporation possess a Maternity Home of 26 beds.

(3) *Children.* There is no Children's Hospital in the Borough, but there are Children's Wards at the Royal Hospital and Union Infirmary.

(4) *Fever.* Cases of Infectious Disease are removed to Penmore Isolation Hospital.

(5) *Smallpox.* Cases of Smallpox are removed to Spital Hospital.

NOTE.—Both the above-named Hospitals are situated in the Borough.

(6) *General.* (a) Chesterfield and North Derbyshire Royal Hospital. (b) Union Infirmary, Newbold Road.

(7) *Unmarried Mothers, Illegitimate and Homeless Children.* Any such cases requiring Institutional Treatment are dealt with by the Guardians.

(8) *Ambulance Facilities.* Motor Ambulances are provided for the removal of cases of infectious disease and also for use in non-infectious cases.

Clinics and Treatment Centres. Particulars under this heading will be found in Appendix 23. *Appendix 23.*

Public Health Staff. Dr. Garrow terminated his duties as Medical Officer of Health on 31/12/28 and Dr. Stirling commenced duty in that capacity on 16/1/29. Owing to a re-arrangement of work in the Department Dr. Powell ceased duty as Ante Natal Officer on 30/9/29, Dr. Campbell taking over these duties from that date. *Appendix 1.*

There has been one change in the Health Visiting Staff, Mrs. Street being appointed in place of Miss Coakill (resigned), and there has also been one change in the Clerical Staff, Mr. Brown having been appointed Chief Clerk in place of Miss Shaw (resigned).

It will be seen from Appendix 1 that four consultants under the Puerperal Fever and Puerperal Pyrexia Regulations were appointed at the end of October.

PROFESSIONAL NURSING IN THE HOME.

Appendix 22. Skilled professional nursing in the homes of the people is provided for general medical and surgical cases, and for certain infectious diseases by the Visiting Nursing Service of the Borough Welfare Committee of the Corporation. The Corporation pay an annual grant of £255 for specific services rendered by the Nurses in the home nursing of measles, ophthalmia neonatorum, whooping cough, puerperal fever, enteritis and poliomyelitis. During the year there have been two changes in the personnel of the nursing staff, Mrs. Hoult and Miss Robinson having been appointed Visiting Nurses in place of Miss McGuffog and Miss McGrath (resigned).

The names and addresses of the various Nurses, together with a summary of their work, will be found in Appendix 22.

Midwives. There are 24 Midwives, to whom no subsidy is granted, in practice in the Borough. Two Midwives, by the approval of the Central Midwives Board, undertake the training of pupils from the Municipal Maternity Home.

Maternity and Nursing Homes. At the beginning of 1929 there were four Maternity Homes in the Borough registered under the Nursing Homes Registration Act, 1927, two as Nursing and Maternity Homes and two as Maternity Homes only, and during the year a further home (Maternity only) was registered. Each Home has been conducted in a satisfactory manner during the period under review. No orders were made during the year refusing or cancelling registration and one application for exemption was made on behalf of the Chesterfield and North Derbyshire Hospital and this was granted.

Appendix 36. *Chemical Work.* The analysis of food and drugs is carried out for the Corporation by Messrs. A. H. Allen and Partners, of Sheffield. The two partners of this firm, Mr. Scott-Smith and Mr. John Evans, are joint Public Analysts for the Borough of Chesterfield. Full particulars of the work done will be found in Appendix 36.

Legislation in Force. All particulars relating to the legislation in force in the Borough will be found in Appendix 21.

SANITARY CIRCUMSTANCES OF THE AREA.

Water. 1929 was remarkable for the long drought which caused much anxiety to Water Authorities throughout the country. In Chesterfield the situation was met satisfactorily, and no emergency action was necessary with the exception of the prohibition of the use of hosepipes and a general appeal to the consumers to use care. *Appendix 39.*

An important development of a new well at Whaley is in progress in conjunction with the Bolsover Urban District Council

Generally speaking the water supply is abundant and of good quality.

During the year six houses were provided with internal water supply in lieu of stand pipes, the Corporation paying one-third of the cost.

Rivers and Streams. It was found necessary during the year to exhibit posters adjacent to the rivers Rother and Hipper calling attention to the provisions of Section 284 of the Chesterfield Corporation Act, 1923, with respect to the deposition of refuse in these streams.

Drainage and Sewerage. Particulars of new sewers laid during the year will be found in Appendix 40. *Appendix 40.*

During the drought period complaints were received of the objectionable smells arising from the sewage works, and during the latter part of the year experiments were carried out on the sewage with chlorine gas with a view to preventing "septic action" and the elimination of odour. Two experimental tanks for "Sludge Digestion" have also been put into operation to further investigate the odour problem and the probability of a sludge less difficult to deal with on the sludge drying areas.

Closet Accommodation. During the year, 22 privies were converted into water closets, and 140 additional W.C.'s provided, the latter being in connection with the decision of the Health Committee that where the condition of the property justified such provision one W.C. per house should be insisted upon, the Corporation in such cases paying a grant of one-quarter of the cost—not exceeding a sum of £3 10s. Od. per W.C. provided. *Appendix 28.*

The Appendix shows by Ward arrangement the character of Sanitary Conveniences in connection with dwelling-houses, the existing privy middens being confined to areas in outlying districts or where no drainage facilities are available.

Appendix 38. *Scavenging.* The removal and disposal of house refuse is undertaken by the Cleansing Department of the Corporation, and for a summary of work done see Appendix 38.

During the year new urinals have been erected at Jaw Bones Hill, Cross Daggers Newbold, and New Whittington.

Appendices 29, 30 & 31. *Sanitary Inspection of the Area.* Details of this work will be found in the appropriate Appendices.

Appendix 32. *Smoke Abatement.* While there is still room for further improvement in this direction, there is evidence of more care being exercised by certain manufacturers in reducing the extent of avoidable black smoke. Nineteen informal notices and one formal notice were served as a result of 145 observations. The Corporation are considering the adoption of Bye-laws in this respect.

Appendix 33. *Premises Controlled by Regulations or Bye-laws.* The number and character of these places will be found in Appendix 33.

HOUSING.

Appendices 41 & 42. During the year 268 new houses were erected—110 by the Corporation and 158 by private enterprise.

Closing Orders were made in respect of 12 houses, one of which was determined—the owner having the house rebuilt. A large amount of repair work on houses not in all respects reasonably fit has been carried out, 184 houses being so dealt with. Of this number, 105 were repaired in consequence of informal notice by the Department, while 79 were repaired as a result of formal notice by the Corporation under Section 3 of the Housing Act, 1925. The total number of formal notices served under the Housing Act was 89, ten of these remaining outstanding at the end of the year.

Appendix 41. Appendix 41 shows the number of houses in each Ward and the broad classification of such houses on the basis of Good, Fair, Poor and Bad.

Common Lodging Houses. At the year end there were ^{Appendix} 34. five registered common lodging houses for men only, with a total number of 353 beds.

Factory and Workshops Act. One hundred and sixty-seven visits were made to factories and workshops during the year, and a summary of these visits will be found in ^{Appendix} 37. Appendix 37.

Offensive Trades. The total number of such trades, including fried fish shops, is 68. These are shown marked by an asterisk in Appendix 33. ^{Appendix} 33.

INSPECTION AND SUPERVISION OF FOOD.

(a) Milk Supply.

Milk Register.

Number of Registered Milk Producers in the Borough	73
Approximate number of Cows housed ...			690
Number of Registered Producers residing outside the Borough	84
Number of Retailers (not producers) in the Borough	70
Number of Retailers (not producers) residing outside the Borough ...			10
Number of Inspections of Dairies and Cowsheds	319

Milk and Dairies Order, 1926. Structural alterations have been carried out on eleven farm premises upon which notices were served in 1928. During the current year formal notices were served in respect of three farm premises and informal notices referring to four other premises. Of these seven notices, six were complied with during the year.

At the year end there were four outstanding notices which cannot be complied with until the stock go out to grass next summer.

Milk (Special Designations) Order, 1923. There is no producer of designated milk in Chesterfield. The Clay Cross Company at Coney Green Farm, Clay Cross, is licensed by the Derbyshire County Council for the production of Grade "A" milk, and also possess a supplementary licence from the Chesterfield Corporation for distribution within the Borough.

Bacteriological Examination of Milk. During the year 99 samples of milk from 765 cows were obtained for bacteriological examination. Of that number, 83 were primary mixed samples from 738 eows, while 16 were secondary samples obtained to identify animals affected with tuberculosis.

The 83 primary samples were in 65 cases the milks of Producers within the Borough and in 18 cases milks brought into the Borough by outside producers.

Four individual cows were identified as giving tuberculosis milk and were slaughtered under the provisions of the Tuberculosis Order, 1925. Three of these animals belonged to producers within the Borough, and one belonged a producer in an adjoining district.

The percentage of mixed milks found to contain Tubercle Bacilli was 4.8 per cent., while the number of cows found to be giving tuberculous milk was equal to .54 per cent.

The number of milks tested for sediment was 120.

Appendix 35. Meat and Other Foods. There are 33 Slaughterhouses in the Borough, all except one being annually licensed. 3,980 visits were made to these slaughterhouses during the year. The total weight of all foods destroyed was over 18½ tons.

Of 4,188 Beasts inspected 5.4 per cent. were found affected with Tuberculosis to a varying extent, while the same disease percentage of 8,219 Pigs inspected was found to be 5.23.

Appendix 36. Sale of Food and Drugs Act and Preservatives in Food Regulations. During the year 215 samples of food were obtained and forwarded to the Public Analyst. Of these, 15 or 6.9 per cent. did not comply with the standard laid down by the various Regulations. In the case of milk the number of primary samples below standard was equal to 7.7 per cent.

The average composition of the 155 milk samples was Fat 3.63 per cent., and Non-Fatty Solids 8.81 per cent. Of the 13 milk samples below the standard, 4 were appeal to cow samples.

Three samples were deficient in both Fat and Non-Fatty Solids, 8 were deficient in Fat only, while 2 were below the standard for Non-Fatty Solids only. Legal proceedings were taken against two vendors, namely:—

- 1.—Selling milk containing 20.9 parts of added water, fined £10 0s. 0d. and £2 2s. 0d. costs.
- 2.—Selling milk containing 5.7 parts of added water fined £15 0s. 0d. including costs.

In the latter case a can of water was discovered in the milk float during this evening purchase and, furthermore, defendant did not appear during the hearing of the case.

The other two samples not conforming with the Regulations comprised one of Sweet Spirit of Nitre and one of Cake Cream. The first was found deficient in Ethyl Nitrite to the extent of 25.6 per cent. The vendor, in this case a small general dealer, was advised to discontinue the sale of this commodity.

The analysis of the "cake cream" showed this substance did not conform with that of Genuine Cream nor of Artificial Cream as defined in the Artificial Cream Act, 1929.

PREVALENCE OF, AND CONTROL OVER, INFECTIOUS DISEASES.

The total number of cases of Infectious Diseases notified during the year was 475, an increase of 76 on last year's figures, this increase being accounted for by an increase in the number of cases of Diphtheria and Scarlet Fever. Notifications of the other Infectious Diseases remained about the same.

Diphtheria. There was an outbreak of Diphtheria at Hipper Street School, resulting in 18 cases being admitted during a very short period to Penmore Hospital. All the children in the three departments of this school were swabbed and as a result 3 contacts were discovered. These contacts were removed to Penmore Hospital and as a result of this action no more cases occurred.

Smallpox. There were 24 cases of Smallpox notified in the early part of the year, but it is pleasing to note that the last notification of a case occurring in the area was received on July 11th, and since that date the Borough has been clear of this disease.

Appendices
14, 15, 16 &
17.

Puerperal Fever and Pyrexia. During the year, as will be seen from Appendix 1, four Consultants were appointed under the Puerperal Fever and Puerperal Pyrexia Regulations, and arrangements were also made whereby cases requiring hospital treatment could be removed to the Norton Annexe of the Jessop Hospital for Women, Sheffield. Under these arrangements five cases were seen by the Consultants and six cases were removed to hospital.

Ophthalmia Neonatorum. Eight cases of this disease were notified and all were nursed at home. The arrangements for dealing with this disease are adequate and efficient. The Visiting Nurses attend immediately after notification and continue attendance as often as is necessary until the condition is cured.

Appendix 16. As regards the Ward distribution of the various infectious diseases, the Rother and Trinity Wards have the greatest incidence, there being respectively 89 and 71 cases notified during the year.

Schick and Dick Tests for Diphtheria and Scarlet Fever.—No use of these tests has been made during the year under review.

Disinfection of Premises. Routine disinfection of premises and bedding is carried out immediately after removal of infectious cases to Hospital, or, in home nursed cases, after the period of infection is over.

Appendix 15 (a). *Bacteriological Work.* Bacteriological Examinations in connection with infectious diseases are carried out at the County Health Department Laboratory, Derby, and a summary of these will be found in Appendix 15A.

Supply of Diphtheria Antitoxin. On application to the Health Department, or the Maternity Home during holiday periods, concentrated diphtheria antitoxin is supplied free to all medical practitioners for use in the Borough.

CANCER.

Appendices 12 & 13. The deaths from Cancer show a welcome reduction on last year's figures, there having been 21 less deaths.

That Cancer is still one of the worst killing diseases is shown by the fact that 9.3 of the total deaths occurring in the Borough were caused by this disease. Until the research work which is going on all over the world as to the causation of this disease is crowned with success, we, as a health

authority, can only through the Press and by other means of publicity seek to educate the public in the early signs and symptoms of cancer and urge them to seek medical advice if any of these symptoms appear.

TUBERCULOSIS.

During the year 92 cases of Tuberculosis were notified, *Appendices 18 & 19.* of which 59 were Pulmonary and 33 Non-Pulmonary cases. There were 57 deaths from Tuberculosis, being the same number as in 1928.

The Rother Ward with 22 notifications showed the highest Ward incidence of the disease.

All Tuberculosis work affecting the Borough is undertaken by the Derbyshire Council Council, and I would like to take this opportunity of extending my grateful thanks to Dr. Nicholson, the Tuberculosis Officer for this area, for the most willing and useful co-operation he has given at all times and for the following report he has kindly compiled for me on the Tuberculosis work for 1929 as affecting the Borough.

General Remarks. The incidence of Tuberculosis in Chesterfield compares favourably with other Boroughs of a similar size. The housing conditions in the Borough are improving and the new type of houses with large bedrooms and windows at each end, allowing of a through ventilation, will in time have a further beneficial effect on the incidence of this disease.

Facilities Offered. Every facility is offered for the diagnosis and treatment of this disease by clinical and X-Ray examinations at the Brimington Road Clinic on Tuesdays and Fridays each week and the 1st and 3rd Mondays of each month.

Sanatorium treatment is provided at Walton Sanatorium and the Tuberculosis Pavilion at Penmore Hospital. Surgical cases of Tuberculosis are treated at the New Bretby Hall Sanatorium, at which adults as well as children will soon be provided for.

After Care. The After Care of these cases is carried out by the Health Visitors and this work is largely assisted by the Borough Welfare District Nursing Committees. Grants towards nursing and the supply of milk are made in certain cases by the County Council.

No action was taken during the year under either the Public Health (Prevention of Tuberculosis) Regulations, 1925, or Section 62 of the Public Health Act, 1925.

MATERNITY AND CHILD WELFARE.

Appendices 8, 9 & 11. *Infantile Mortality.* The number of infants dying before reaching the age of one year was 82 as compared with 84 during 1928, giving an Infantile Mortality Rate of 67.6 compared to that of 74 for England and Wales as a whole. On analysing the age at which death occurred it will be seen that 28, or one-third of the total deaths, occurred within one week of birth. As regards the Ward Infantile Mortality, the Trinity and St. Helen's Wards showed the highest figure with rates of 120 and 98 respectively.

Of the 1,213 children born during 1929, 682 or 56.2 per cent. of them attended the Child Welfare Centres.

Still Births. During the year under review 70 legitimate and 3 illegitimate Still Births were registered.

Appendix 27. *Home Visiting.* The Health Visitors paid 4,672 visits to the homes of children under one year of age and 4,048 visits to children between the ages of one and five years, giving a total of 8,720 visits for 1929 as against a total of 10,703 for 1928. The decrease in the number of home visits paid was due to the fact that there was one Health Visitor short on the staff for a period of three months during the year. The Health Visitors also paid 222 visits to expectant mothers and 521 other visits.

Appendix 26. *Infant Welfare Centres.* It is again evident this year that the Chesterfield mothers still appreciate the value of the Child Welfare Centres as is shown by their continued support and regular attendance. 1,669 children attended the Centres during the year, these children making 13,770 attendances.

A marked feature of the Infantile Mortality is the difference in the rate of the babies who have attended the Centres as against those who have not. Of the 682 babies born during the year who attended the Centres, 12 died, whereas of the other 531 babies who did not attend the Centres, 70 died. I do not claim that this vast difference is all due to the advice and instruction given at the Centres, but I am convinced that the more babies we can get at the Centres, the more so will the Infant Mortality Rate be reduced.

Appendix 26. *Ante-Natal Clinic.* As ante-natal work is one of the most certain ways of reducing maternal mortality, it is pleasing to note that the Ante-Natal Clinic was again well attended during the year.

Voluntary Help. During 1929 the Voluntary Helpers have continued their visits to the Child Welfare Centres, and I would like to express my best thanks to them for their continued interest and enthusiastic support.

Free and Assisted Milk Scheme. Under this scheme expectant mothers and children up to the age of three years of age are eligible for a supply of cow's milk if the family income is within the governing scale, and milk to the cost of approximately £400 was supplied during the year.

Maternity Home. During the year under review, 455 ^{Appendix} _{25.} cases were admitted to the Home, an increase of 27 on the previous year.

It is pleasing to note that patients who have previously been confined in the Home continue to return for successive pregnancies.

The Maternity Home is recognised as a Training School for Midwives, and regular courses of lectures to pupil midwives have been given, and it is gratifying to note that all pupils attached to the staff of the Home have been successful in obtaining the certificate of the Central Midwives Board.

The summary of work performed in the Home during 1929 will be found in Appendix 25.

Appendices.

APPENDIX 1.**PUBLIC HEALTH STAFF.**

Medical Officer of Health and School Medical Officer—

(3) School Clinic at 59, Saltergate— (a) Minor Ailment Treatment	Daily mornings	Chesterfield Education Committee
(b) Medical Inspection and Consultation	Tuesday and Friday mornings	do.
(c) Ophthalmic	Tuesday and Saturday mornings	do.
(d) Dental	Daily mornings	do.
(4) Tuberculosis at Brimington Road	Tuesdays and Fridays from 10 a.m. to 12-30 p.m. and 2 p.m. to 5 p.m.	County Council of Derbyshire
(5) Venereal Diseases At Chesterfield and North Derbyshire Royal Hospital	Males— Tuesdays, 4-30 to 6-30 p.m. Fridays, 2-30 to 4-30 p.m. Females— Tuesdays, 2 to 4 p.m. Fridays, 11 a.m. to 12-30 p.m.	County Council of Derbyshire

APPENDIX 24.

Hospitals Provided or Subsidised by the Local Authority or by the County Council.

A. (1) FEVER.

Penmore Isolation Hospital, situated in Hasland Ward, has 58 beds for scarlet fever, diphtheria, typhoid, and other acute specific infectious diseases such as poliomyelitis, encephalitis lethargica, measles, enteritis, or any other infectious disease in which the circumstances render it necessary or advisable that the case be removed to hospital.

(2) SMALLPOX.

Spital Smallpox Hospital, situated off Spital Lane in the extreme south of the Borough, has been open now for eight years for the reception of cases of mild smallpox from Chesterfield and North-East Derbyshire, and by arrangement from Mansfield and some other outside authorities.

B. (1) TUBERCULOSIS.

Walton Sanatorium, belonging to the Derbyshire County Council, but situated in the Borough of Chesterfield, has accommodation for 124 patients suffering from tuberculosis. Penmore Tuberculosis Pavilion has 18 beds for advanced cases of pulmonary tuberculosis. These 18 beds were occupied by male patients till February, 1927, when, by arrangement with the County Council, the male patients were exchanged for female patients.

(2) MATERNITY.

The Chesterfield Municipal Maternity Home has 26 beds for maternity cases. Three of these beds are reserved for cases admitted by the County Council. The remaining 23 beds are for Borough cases.

(3) CHILDREN.

There are children's wards at the Chesterfield and North Derbyshire Royal Hospital, also in the Infirmary, Newbold Road, Chesterfield, under the Guardians.

(4) OTHER.

General medical and surgical cases are admitted to the Chesterfield and North Derbyshire Royal Hospital (190 beds) from Chesterfield and North-East Derbyshire. The Guardians provide 205 beds at the Union Infirmary. The Corporation

APPENDIX 24—(Contd.)

pay an annual contribution to the Royal Hospital, this amount being at the rate of one-third of the total amount contributed by Corporation employees.

There is no institutional provision for unmarried mothers, illegitimate children and homeless children in the area except that provided by the Guardians at the Infirmary and Children's Home.

Ambulance Facilities.

(a) FOR INFECTIOUS CASES:—

- (1) Motor ambulance at Penmore Hospital for fever cases.
- (2) Motor ambulance at Spital Hospital for smallpox cases.

(b) FOR NON-INFECTIOUS CASES.

- (1) Borough Ambulance controlled by the Watch Committee of the Corporation.
- (2) Ambulances owned and run by collieries, ironworks, etc., in the district.

APPENDIX 25.

Corporation Maternity Home.

Summary of Work during the Year.

	Borough	County	Total.
No. of cases admitted since the opening	1938	841	2779
No. of cases admitted during 1929	303	152	455
No. of Babies born during year :—			
Live Births	261	117	378
Still Births	15	22	37
No. of Mothers discharged	298	141	439
No. of Mothers died	1	3	4
No. of Infants died	5	4	9
No. of cases remaining in the Home on December 31st, 1929 :—			
Mothers	13	7	20
Infants	9	5	14

APPENDIX 26.

Maternity and Child Welfare.

Attendances at each of the Maternity and Child Welfare Centres, 1929.

	Infants & Children Attending	Total Attend. made	Average Weekly Attend.
Maternity Home (North & Central Wards)	478	3155	70.1
Maternity Home (West Ward)	356	2878	63.9
Maternity Home (South Ward)	340	2799	62.2
Adult School, Whittington Moor	352	3419	75.9
Adult School, New Whittington	143	1519	33.7
	1669	13770	61.8

Summary of Work done at Infant Welfare Centres and Ante-Natal Clinics.

Total No. of Children attending Centres	1669
Total Attendances	13770
No. of Children who made first attendances	774
No. of visits made by these children	5410
No. of children attending in current year who attended in previous year	895
No. of visits made by these children	8360
No. of New attenders under 1 year of age	682
No. of New attenders between 1—5 years of age	92

Ante-Natal Clinic.

No. of first attendances	339
No. of re-attendances	691

Methods of Feeding on First Attendance at the Centres.

Method	Total
Natural (Breast)	509
Artificial (various)	119
Combined (Natural and Artificial)	54
Children over 1 year—various diets	81
Breast feeding over 1 year of age	11
Total	774

APPENDIX 27.

Summary of Work done by the Health Visitors during the year.

Number of first visits to infants	1,260
,, , re-visits to infants	3,412
,, , visits to Children 1—5 years	4,048
,, , first visits to Expectant Mothers	...		157
,, , re-visits to Expectant Mothers	...		65
,, , Sanitary Defects reported to Sanitary Inspectors	16
,, , other visits	521

APPENDIX 28.

Table showing Types and Numbers of the various Sanitary Conveniences in dwelling-houses in the Borough according to Wards.

APPENDIX 29.

SANITARY INSPECTION OF THE AREA.

Table showing the Work carried out by Sanitary Inspectors during 1929:—

Complaints investigated	321
Nuisances found	755
Nuisances abated	591
Schoolrooms Disinfected	4
Houses Disinfected	470
Visits to Infected Houses	343
Visits to Dairies, Cowsheds and Milkshops	319
Visits to Bakehouses	57
Visits to Ice-Cream Shops	82
Visits to Butchers' Shops	358
Visits to Fishmongers' Shops	23
Visits to Other Premises where Foodstuffs are prepared and sold	173
Visits to Offensive Trades	130
Visits to Slaughterhouses	3,980
Visits to Markets	127
Visits to Manure Receptacles	42
Visits to Common Lodging Houses	128
Visits to Houses let in Lodgings	92
Visits to Factories and Workshops	103
Visits to Drains to New Buildings	249
Drains tested by Smoke or Water	247
Number of Re-inspections	2,221
,, „ Miscellaneous Visits	1,110
,, „ Observations re Smoke	145
,, „ Houses Inspected	259
,, „ Informal Notices	719
,, „ Statutory Notices	227

APPENDIX 30.

*Record of Works carried out as a result of action taken
by the Sanitary Inspectors.*

Obstructed Drains Cleansed	171
Drains Reconstructed	29
Drains Tested by Smoke or Water	19
Inspection Chambers Built or Repaired	20
Gully Traps Fixed	21
Defects in Drains Repaired	33
Sink Wastes Repaired	30
Bath and Lavatory Wastes Repaired	—
New Sinks fixed or Defects remedied	47
Rain Water Pipes Repaired	43
Rain Water Pipes Disconnected	12
W.C. and Vent Pipes Repaired	13
Eaves Spoutings Repaired	117
Privies converted into W.C.'s	22
Water Closets Repaired	229
W.C.'s Provided	140
Ashpits replaced with Bins	20
New Dustbins Provided	36
Dirty Closets Cleansed	28
Dirty Premises Cleansed	38
Dirty Urinals Cleansed	—
Urinals Repaired or Provided	1
Windows Repaired	157
Damp-proof Courses inserted in Walls	32
Roofs Repaired	156
Floors Repaired	125
Doors Repaired	61
Plastering Repaired	149
Damp Walls Repaired	117
Defective Fireplaces, etc., Repaired	167
Defective Water Supply Remedied	7
Houses Provided with Internal Public Water Supply	6
Proper Food Store Provided	13
Houses Overcrowded dealt with	2
Ventilation Provided or Improved	16
Yards Repaved	72
Yard or Footpath Surfaces Repaired	26
Accumulations of Refuse Removed	21
Nuisance from Fowls and Other Animals Abated	7
Manure Pits Provided or Repaired	—
Miscellaneous Defects Remedied	176
Rat-Infested Premises Cleared	14
Water in Cellar Cleared	8

APPENDIX 31.

Table of Nuisances discovered and dealt with.

	No. of Informal Notices served by Sanitary Inspector.	No. of Legal Notices served by Local Authority (apart from action under Housing Act, 1925).	No. of Nuisances abated with or with- out Notice.
No. disconnection of waste pipe	2	2
Defective waste pipe, traps, inlets and drains	87	6	110
Drains obstructed	169	5	171
CLOSETS AND ASHPITS :—			
Defective privies, pail closets and Ashpits (not for conversion)
Conversion of privies into W.C.'s	4	22
Conversion of pail closets into W.C.'s
Conversion of privies into pail closets
Defective water closets	135	11	188
Provision of additional W.C.'s	6	39	140
Provision of portable Ashbins	48	21	106
Dirty closets	23	28
Paving of courts and yards	49	39	98
Roofs, eaves-spouts and down-spouts	73	5	129
Sinks	14	2	18
Insufficient ventilation	2	2
Windows	14	17
Dampness	15	1	21
Water in cellars	9	8
Water Supply	7	1	13
Overcrowding	4	2
Foul condition of houses	19	24
Offensive accumulations	22	21
Animals improperly kept	8	7
Pigsties	2	2
Smoke observations	19	1	19
Urinals
Nuisances not specified above	89	107
Totals	816	135	1255

APPENDIX 31 (Contd.).

	No. on Register.	Inspections made.	Notices Served.	Nuisances abated with or without Notice.

Wagon Repairs Ltd., Whittington	1	1
	145	116 $\frac{3}{4}$	2.0	40, 1 kiln and 2 coppers.

APPENDIX 33.

Premises and Occupations which can be controlled by Byelaws and Regulations.

The following table shows the character and number of such premises in the Borough:—

Common Lodging-houses	5
(One, the municipal Hostel, is owned and supervised by the Corporation. Meals can be obtained and the Hostel has accommodation for 160 men.)					
Houses Let in Lodgings	2
Slaughter-houses	33
*Tripe Boilers	3
*Gut Scrapers	2
*Tan Yards	1
*Tallow Melters	1
*Dealers in Rags and Bones	3
Bakelhouses	32
*Fried Fish Shops	58
Dairies, Cowsheds and Milkshops	143
Tents, Vans, Sheds	78
Workshops of various kinds	208

APPENDIX 34.

Common Lodging Houses.

Situation.	Registered number of Lodgers.	Remarks.
Municipal Hostel, Hipper Street	160	Owned by Corporation. Meals served.
33, Durrant Road	82
47, St. Mary's Gate	49	Closed in March, 1930, and converted to Tenement House.
47, Lordsmill Street	41
The "Swan" St. Mary's Gate	21

APPENDIX 35.

(b) The following figures summarise the results of Meat Inspection for the year 1929 :—

	Tons.	Cwts.	Qrs.	Lbs.
Diseased and Unsound Beef	6	12 10
Diseased and Unsound Pork	2	14 13
Diseased and Unsound Mutton	3	2 15
Diseased and Unsound Veal	1	1
Diseased and Unsound Offals	4	13	2 1
	14	4	2	11
Various other Foods—Vegetables, Fish, Tinned Goods, etc.	4	7	3 14
Total for all Foods	18	12	1 25

No. of Carcasses Inspected :—4,188 Beasts ; 341 Calves ; 4,608 Sheep ; 8,219 Pigs.

No. of Visits to Slaughterhouses	3,980
No. of Visits to Butchers' Shops	358
Percentage of Beasts found Tuberculous	5.4
Percentage of Pigs found Tuberculous	5.23

The following table gives a summary of the results of meat inspection annually for the last ten years. The high figures since 1925 are largely due to the active operation of the Public Health (Meat) Regulations, 1925 :—

Year.	Visits to Slaughter-houses.	Diseased Meat and Organs destroyed.				Total Weight of all Food Destroyed			
		Tons.	Cwts.	Qrs.	Lbs.	Tons.	Cwts.	Qrs.	Lbs.
1920	1380	6	13	2	6	11	6	2	21
1921	1596	2	18	3	5	10	15	3	25

1928	229	205	24	10.4	3	£17/2/0
1929	215	200	15	6.9	2	£27/2/0

APPENDIX 37.

1.—Factories and Workshops.

The following table shows the number of workshops on the register at the end of the year :—

Factory—Bakehouses	14
Workshops—Bakehouses	18
Dressmakers	18
Milliners	23
Woodworkers	20
Tailors	22
Saddlers	3
Smiths (tin and iron)	14
Boot Makers and Repairers	24
Cycle and Motors	24
Other Trades	28
				208

2.—Inspection of Factories and Workshops.

Premises.	No. of Inspections.	No. of Notices.	No. of Prosecutions
Factories, including factory laundries	25	2
Workshops, including workshop laundries	135	13
Outworkers' premises	7
	167	15

3.—Defects found in Factories and Workshops.

Particulars of Nuisances under the Public Health Acts.	Found.	Reme-died.	Referred to H.M. Inspect.	No. of Prosecu-tions insti-tuted
Want of Cleanliness	10	10
Want of Ventilation
Overcrowding
Want of Drainage of floors	1	1
Other Nuisances	4	4
SANITARY ACCOMMODATION—				
Insufficient
Unsuitable or defective
Not separate for sexes
Totals	15	15

APPENDIX 38.

BOROUGH OF CHESTERFIELD CLEANSING
DEPARTMENT.

CLEANSING SERVICES.

During the year 1929—30 the following work has been carried out by the Department:—

REFUSE COLLECTION.

Number of Bins emptied	710,596
„ „ Pits emptied	939
Refuse collected	19,629 tons.
Yield per 1,000 population per day (365 days)	16.14 cwts.

REFUSE DISPOSAL.

Tonnage disposed by Screening Plant	...	16,798 tons.
By Tipping	...	3,580 „
Total	...	20,378 tons.

An income of approximately £1,011 has been derived from the sale of material.

STREET CLEANSING.

Mileage of Streets	72.6 miles.
Gullies emptied	23,685
Tonnage of Gully Refuse	1,357 tons
Tonnage of Street Refuse	2,885 „

PUBLIC URINALS.

Number in Borough	24
„ of Cleansings per year	7,208

APPENDIX 42.**4.—HOUSING.**

The following is a tabular statement of work done in regard to housing in 1928:—

Number of new houses erected during the year:—

(a) Total [including numbers given separately under (b)]	268
(b) With State assistance under the Housing Acts:							
(1) By the Local Authority	110
(2) By other bodies or persons	158

1.—UNFIT DWELLING-HOUSES.

(1) Number of dwelling-houses inspected for housing defects (under Public Health or Housing Acts)	246
(2) Number of dwelling-houses which were inspected and recorded under the Housing (Inspection of District) Regulations, 1910	222
(3) Number of dwelling-houses found to be in a state so dangerous or injurious to health as to be unfit for human habitation	12
(4) Number of dwelling-houses (exclusive of those referred to under the preceding sub-head) found not to be in all respects reasonably fit for human habitation	190

2.—REMEDY OF DEFECTS WITHOUT SERVICE OF FORMAL NOTICE.

Number of defective dwelling-houses rendered fit in consequence of informal action by the Local Authority or their Officers	105
---	-----	-----	-----	-----	-----

3.—ACTION UNDER STATUTORY POWERS.**A.—Proceedings under Section 3 of the Housing Act, 1925:—**

(1) Number of dwelling-houses in respect of which notices were served requiring repairs	89
(2) Number of dwelling-houses which were rendered fit—			
(a) By owners	79
(b) By Local Authority in default of owners	—

Appendix 42 (Contd.).

B.—Proceedings under Public Health Acts:—

(1) Number of dwelling-houses in respect of which notices were served requiring defects to be remedied	—
(2) Number of dwelling-houses in respect of which defects were remedied after service of formal notices—						
(a) By owners	—
(b) By Local Authority in default of owners	...					—

C.—Proceedings under Section 11, 13, and 15 of the Housing Act, 1925:—

(1) Number of representations made with a view to the making of Closing Orders	12
(2) Number of dwelling-houses in respect of which Closing Orders were made	12
(3) Number of dwelling-houses in respect of which Closing Orders were determined, the dwelling-houses having been rendered fit	1
(4) Number of dwelling-houses in respect of which Demolition Orders were made	2
(5) Number of dwelling-houses demolished in pursuance of Demolition Orders	1
